

Clarke's PyroGuard PyroComm Windows Software

The screenshot displays the PyroComm software interface. At the top is a menu bar with options: File, Status, Setup, Testing, Reports, Options, Window, and Help. Below the menu is a toolbar with icons for a key, a no-smoking sign, a red fire alarm, a book, a graph, and a hand. The main area features a 'Current Events Window' with a table of events. Below the table is a logo for Clarke's PyroComm, which includes a duck and the text 'Clarke's PyroComm'. At the bottom is a status bar with icons for Alarm, Flow, Trouble, Zone Disabled, and No Serial Cable, along with the date and time.

Card	Zone	Event Description	Date/Time	Sparks
1	1 - Hog Line	Zone Offline	05/25/2001 09:25:55:77

PyroComm

ALARM! FLOW TROUBLE Zone Disabled No Serial Cable 5/25/2001 9:21 AM

The PyroComm Software is designed to enhance the functions of the PyroGuard CXL control console. With PyroComm, you can monitor all functions and interact with the CXL console from a PC unit. This includes monitoring and resetting of Alarm and Trouble Condition Events.

To help with the routine maintenance of your PyroGuard CXL Console, PyroComm has many console testing features. These features include testing the functionality of Sensors, Valves, Relays Outputs, Horn & LED's, and Card Communications.

Does your plant or maintenance supervisor need a report listing all of the PyroGuard events that occurred during a designated period? PyroComm allows you to create such a report including only the events you want to see. You can filter events by Date, Time, Zone, and Type. Event reports can then be saved to a word processor, printed, or exported to Microsoft Excel. Included in the events are detailed zone specific descriptions.

With PyroComm, you can view your consoles entire configuration such as zone specific descriptions, sensor and valve configurations, pipe diameter, and engineered air velocity.

Are you worried about plant personnel changing console configurations? PyroComm has password protection built in for all of the key data. This allows users to access only the information you want them to use.

PyroComm Windows Software – Features

- Runs on all Microsoft Windows operating systems 95 and newer.
- Unlimited event storage from main control console.
- Assign different functions to control consoles programmable relay outputs.
- Includes context sensitive help with access to the PyroGuard Web Site for online help.
- Extensive testing features including Automatic and Manual Sensor and Valve testing.
- Create detailed event reports that can be saved to a file, printed or exported to Excel.
- Detailed Zone information including sensor and valve configuration.
- Password Protection of selected information.
- Monitor which zones have been disabled at the console.
- Live Print of Events or Print Reports to either Dot Matrix or Laser Printers.
- View and Reset Spark totals from each I/O card.
- Associate Alarm and Trouble events with wave sound files to hear when they occur.
- Monitor console voltages from the software to assist in troubleshooting.
- RS232 interface (100 ft) to the PyroGuard Console or Short haul modems (14 miles).
- Console and Software manuals in PDF.
- Free lifetime maintenance releases.
